

# E-RISE Method Questionnaire

With this questionnaire we would like to collect your impressions about the method that you are working with, regardless of the scenario on which you are asked to apply the method. Please provide your responses sincerely and spontaneously, since there are no right or wrong answers.

Read a pair of adjectives at a time and mark the number that corresponds to your opinion. Take for example the first pair of adjectives. You are asked to judge the application on the dimension unsatisfactory - satisfactory. A reply is 1 if you think that the application is very unsatisfactory, or 5 if you believe that it is very satisfactory. Use the scores to give intermediate shades of opinion. Pay attention to the polarity of adjectives.
